T NEELANANDA

Consultant

AWS Cloud | DevOps

Profile

AWS Cloud Infra & DevOps Engineer offering **11+ years** of diverse experience in Development, Support and Implementation in Amazon Web Services and Multi Technology services of Cloud and Data Migration in IT industry. Hands on experience with IaaS platforms(AWS) and exposure to DevOps/automation tools

Expertise in configuring Amazon Web Services like **EC2, AWS Elastic Container Service, Amazon, Elastic Beanstalk, Lambda, ELB, Auto-Scaling, IAM, SNS, SQS, Cloud Watch, S3 bucket, EBS, Cloud Trail, Elastic Search Engine, Single sign-on, Data Pipeline, EKS Amazon RDS, AWS Database Migration Service, AWS Service Catalog, AWS CodeBuild, CodeCommit, CodeDeploy, CodePipeline, Lambda, Elastic Load Balancer, AWS Cloud Front & Cloud Formation** through AWS console.

Expertise in Agile & DevOps Methodologies, Release Engineering, Configuration Management, Cloud Infrastructure & Automation. It includes **Amazon Web Services, Linux, Git, GitHub, Bitbucket, Maven, SonarQube, JFrog Artifactory, Jenkins, Docker, Kubernetes & Ansible** etc.

Migration of applications from on premise to Cloud and setting up CI/CD

Jenkins, GitLab & Concourse as a primary tool for implementing the continuous integration & continuous delivery of their code.

Experience on creating **GIT** Branches, Tags and merging the source code between different branches.

Containerization Tool Docker writing Docker files for creating Docker images and containers for different environments.

Creating a branching model/strategy for developers and correspondingly setting up CI/CD for various environments like Dev, QA, PRE-PROD, PROD environments.

Key Impact Areas

- AWS Cloud Technologies
- Project & Account Management
- Container Orchestration Kubernetes
- Cloud Infra Setup
- DevOps
- CI/CD Implementation & Automation
- Strategic Planning
- Agile Methodology
- System Migration & Transition Management

Soft Skills

Communicator

Collaborator

Client Relationships

Team Lead

Analytical

Domain Knowledge

- ❖ Life Sciences
- ❖ Health Care
- ❖ Telecom

Career Timeline

Education & Credentials

 **B.Tech in Electronics & Communication Engineering** from Jawaharlal Nehru Technological University.

IT Skills

Cloud Computing:	Amazon Web Services (AWS)
Configuration & Infra Management:	Ansible, Terraform
SCM:	Git, GitHub, BitBucket and AWS Code Commit
Databases:	Redshift, PostgreSQL, SQL, Oracle and DynamoDB
Artifactory Repository:	JFrog
Programming Languages:	SQL, Python (Beginner)
Build Tools:	Maven, Gradle
CI/CD Orchestration Tools:	Jenkins, GitLab, AWS Code Build, Code Deploy and AWS Code Pipeline
Containerization Tool:	Docker
Container Orchestration Tool:	Kubernetes
Ticketing Tool:	Jira
Monitoring Tool:	Splunk, AWS CloudWatch, AWS CloudTrail and AWS Config
Unit Testing:	JUnit
Code Quality Tool:	SonarQube
Operating Systems:	Linux, Ubuntu, CentOS and MacOS
Application Server:	Tomcat

Certifications

-  **AWS Certified Solutions Architect Associate**
-  **AWS - Certified Developer-Associate**
-  **AWS Certified DevOps Engineer Professional**
-  **Scrum Foundation Professional Cert(SFPC)**

Notable Accomplishments Across the Career

- Achieved multiple Outstanding performance awards & appreciations for successful completion of DAE & CIS deployment across various client environments.
- Led and implemented CI/CD to automate builds using XCODE for first time for MyPath2CC using available and shared resources like mac mini servers within short period of time. This template is being used as golden template for more than 10+ projects for their internal developments.
- Lead DevOps automation for CI/CD pipeline starting from SCM to Prod deployments in AWS using Jenkins from Scratch. This eventually resulted with zero outage during deployment.

Major Projects

Organization: TCS

Period: Since May/21

Clients: Roche

Designation: Consultant / AWS Infra & DevOps

Description: Implementation of CI/CD to automate builds using XCODE for first time for MyPath2CC using available and shared resources like mac mini servers within short period of time. This template is being used as golden template for more 10+ projects for their internal developments.

Roles & Responsibilities:

- ❖ Responsible for identifying and troubleshooting cloud issues in production, resolving them and taking appropriate actions to prevent them in future.
- ❖ Responsible for creating technical knowledge documents for new issues and their resolution steps.
- ❖ Extensively worked Kubernetes end to end Implementations & DevOps solutions.
- ❖ Build and deployed Dockers containers for implementing Microservice Architecture.
- ❖ Knowledge and exposure working across AWS CLI, REST API's, microservices.
- ❖ Experience in various source code management activities using GIT involving branching, merging.
- ❖ Creating alerts for different services and managing them using AWS SNS, AWS CloudWatch alarms etc.
- ❖ Working across AWS S3 buckets, IAM for managing different application users and controlling their access and permissions.
- ❖ Responsible for identifying major areas for automation and improvement in current environment and enhance it further.
- ❖ Developed and maintained automated CI/CD pipelines for code deployment using Jenkins.
- ❖ working on AWS and its services like AWS IAM, VPC, EC2, ECS, EBS, RDS, S3, ELB, Auto Scaling, Route 53, Cloud Watch, CloudTrail, SQS and SNS and experienced in Cloud automation using AWS Cloud Formation templates to create custom sized VPC, subnets, NAT, EC2 instances, ELB and Security groups.
- ❖

Organization: UST

Period: 2019-2021

Clients: CarynHealth

Designation: System Analyst / AWS Infra & DevOps

Description: Caryn Health enrollment system allows the broker and members or subscriber to enroll them with the system and send information to the respective Trading Partner base on the plan details.

Roles & Responsibilities:

- ❖ working on AWS and its services like AWS IAM, VPC, EC2, ECS, EBS, RDS, S3, ELB, Auto Scaling, Route 53, Cloud Watch, CloudTrail, SQS and SNS and experienced in Cloud automation using AWS Cloud Formation templates to create custom sized VPC, subnets, NAT, EC2 instances, ELB and Security groups.
- ❖ Coordinate/assist developers with establishing and applying appropriate branching, merging conventions using GIT source control.
- ❖ Implemented a production ready, load balanced, highly available, fault tolerant Kubernetes infrastructure.
- ❖ Created private cloud using Kubernetes that supports DEV, TEST, and PROD environments.
- ❖ Containerized all the Ticketing related applications - Spring Boot Java applications using Docker.
- ❖ Created a Continuous Delivery process to include support building of Docker Images and publish into a private repository.

Organization: Ericsson

Period: 2014-2019

Clients: MBNL

Designation: Consultant / AWS Infra & DevOps

Description: Telecom Data Analytics.

Roles & Responsibilities:

- ❖ Understanding the requirements by reviewing the functional specification documents.
- ❖ Involved in Client interactions for functional understanding and discussions.
- ❖ Involved in establishing VPN connections from corporate network to AWS VPC.
- ❖ Created Security groups and NACL to all the resources and appropriate ports opened.
- ❖ Creating servers, AMIs, S3, taking snapshots, VPCs, subnets, load balancing and auto-scaling in AWS.
- ❖ Creating users in AD and adding instances to domain.
- ❖ Deployed the EAR and WAR archives into nginx and Apache Servers.
- ❖ Worked on cron in Linux servers for managing the logs of the web servers.
- ❖ Developing scripts for build, deployment, maintenance and related tasks using Jenkins, Docker, Maven Environment AWS-EC2, VPC,Sub nets, NAT,VPN, S3, IAM, SNS and Cloud Watch, AWS Inspector, Terraform . Manage and maintain monitoring to ensure uptime and SLA levels. . Manage backup and storage.

Personal Details

Date of Birth: 20th May 1987

Languages Known: English, Telugu, Hindi & Tamil

Present Location: Bangalore
